Job # EE1508

Job Title: Field Engineer – Drives and Controls	Location: Salem, VA, USA
---	------------------------------------

Business Unit/Department:
Operations

Job Responsibilities:

In this job you will perform hardware and software design engineering tasks leading to the development of software and circuitry for real time industrial process control systems, perform process application design and programming of digital power conversion systems to power AC and DC drives, install and commission industrial control systems including tune-up of closed loop regulators, troubleshoot and correct process application problems in complex control systems configured with multiple controllers and local area networks. You will also provide leadership to promote good TMGA customer teamwork during the on-site phase of a project and introduce TMGA leading technology.

Minimum Qualifications:

BSEE or BSME required. Experience with AC and DC Drives and Controls used in the AC and DC motors for industrial process control. Experience with PLC programming. Good communication skills. Ability to travel and work at customer sites worldwide. Personal computer hardware and software skills.

Desired Qualifications:

Eight to ten years of experience with Metals, Material Handling, Paper and General Industry processes and customers. Foreign language skills and/or international experience. Proven leadership skills.
